

More About the Secrets of Vince Burton's Beautiful Color Trim

by George White

In the last exciting issue of this fish wrapper, I described several of the secrets of Vince (The Friendly Cajun) Burton's beautiful models. I stated that Vince uses 3M automotive striping tape as a color separator/windshield/window outliner. To be more specific, Vince uses 1/16" wide 3M Scotchcal™ Striping Tape. In his experience, that is the only brand which will adapt easily to curves. I confirmed that the auto parts store brand that I tried indeed does a nice job for straight lines, but does not work well outlining curves. You should be able to purchase Scotchcal striping tape at any full line professional auto paint supplier. You will not likely find it in an auto parts store.
