

NOTE: I GENERALLY DRILL THE HOLES IN THE 1/8" X 1/8" TUBING BEFORE I CUT IT OFF 7/32" LONG. IT IS EASIER TO HANDLE WHEN YOU ARE DRILLING.

THEN I SOLDER THE 1/8" X 1/8" X 7/32" PIECE ON THE WIRE. I FILL THE PIECE UP WITH SOLDER, THEN I RE-DRILL THE CROSSHOLE FOR THE BAIL WIRE.

THEN I PUT THE WIRE IN THE NOSE BLOCK AND BEND THE HOOK TO HOLD THE RUBBER MOTOR. I THEN BEND AND TEST FIT THE BAIL BEFORE FIXING IT IN PLACE
